
KAVAYN

About Kavayn

Honoring the traditions of Pacific Islanders, we have worked with farmers in villages across all islands to support their needs and establish a quality connection to sustainably harvested noble kava extracts for the world to enjoy.

Our joint ventures with local firms and communities in Vanuatu ensures we only harvest fresh kava from select gardens in Center Santo. We work directly with local farmers, often assisting in harvest, transport, and processing. Kavayn's kava is:

- Harvested fresh by hand (for freshness and quality we keep the Kava in the ground until the last minute)
- Washed with high-pressure water and sanitized naturally.
- Sun dried or frozen immediately for preservation.
- Tracked and documented for full traceability

After arriving at our facility, your kava is processed using state-of-the-art supercritical CO_2 extraction technology.

This ensures the cleanest, most potent kava extract possible—used in the premium product you're purchasing now.

To demonstrate our commitment to quality, we provide a Certificate of Analysis (CoA) for every batch we produce.

This document verifies the purity and potency of our kava, ensuring that each product meets the highest standards.
